About the Best Practice in Milking Course

This programme is developed in conjunction with the expertise of **Teagasc**, **AHI** (Animal Health Ireland) and **FRS Network** (Farm Relief Services).

The programme is designed to develop your skills as a milker to ensure that all cows are milked effectively and efficiently.

This course is unique as it brings together the theory element of milking and the practical implementation of the theory. A customised DVD aids its delivery and acts as a reference guide after the course for the milker. The tutors for the course have been specifically trained and course content approved by the experts in the area of milking best practice.
